Présentation

Small house located in the center of the village of Rouvrou, near the Vélo Francette, in the heart of the Suisse Normande. Living room with open kitchen, 2 bedrooms upstairs, shower room with toilet. Small balcony with garden furniture.

LABEL VELO

Concerning the current sanitary conditions,

We ensure a meticulous cleaning and decontamination of the premises. Each object likely to have been handled is disinfected with alcohol wipes (remote control, door knobs, hair dryer, switches and furniture edges, chairs, etc.)

The sanitary facilities: shower, shower walls, taps, basins and toilets are cleaned and disinfected with a suitable product such as Sanytol or similar.

The premises are aired half a day between each rental and a spray of aerosol and textile disinfectant is carried out after each departure.

The carpets, if washable, are machine washed at 60°, otherwise they are steam cleaned.

All colored linen is washed at 60° with the addition of a professional linen disinfectant. White linen is washed at 90° with the addition of a professional linen disinfectant.

Curtains and cushions are washed between rentals with the addition of disinfectant.

The surfaces: table, work plan are cleaned and disinfected with Sanytol or similar products.

All this work of ...

**MONTAGNES
de NORMANDIE**

... preparation to better welcome you takes time, you will understand the need to block between a departure and your arrival several hours to ensure your safety completely.

If the whole gite is rented or if it is a guest room, the vacant time may require up to a full day.

We provide soap at every water point, hydro-alcoholic gel in the entrance, disinfectant wipes and surface sprays.

We had to remove most of the books, leaflets and decorations from the house to limit cleaning and disinfection. What remains is in a plastic bag and can be easily disinfected.
